

الصف الأول ثانوي

# اللغة الإنجليزية

امتحان الشهر الأول

**Q1: Read the text carefully, and then answer the questions that follow.**

**Teacher:** Our project today is to find out about renewable energy resources. That means resources which are continually replaced and will not run out any time soon. Ramzi, what have you chosen as an example of a renewable resource?

**Ramzi:** The sun is a renewable source of energy. A lot of living things depend on its energy for heat and light. This energy can also be captured and used to power things. For example, if you have a solar calculator, it contains a solar cell which uses sunlight to power the calculator. Solar panels that are used on houses have thousands of solar cells, and they make electricity from the sun's heat. The major advantage of solar energy is that, after the solar panels have been installed, electricity is not expensive to generate.

**Teacher:** What about you, Nadia? What did you find out?

**Nadia:** In windy places, wind energy can be used to make electricity, using wind turbines. These turbines are found in 'wind farms'. They have blades that are attached to a generator at the centre. The wind spins the blades and the generator runs. This makes electricity. However, wind turbines can't work if there is no wind, and sometimes the wind speed is so high it damages them.

**Teacher:** Ibrahim, what's your example of a renewable resource?

**Ibrahim:** It's biomass. Biomass is plant material and animal waste that is used as fuel. For example, wood is a biomass fuel as long as we continue to plant new trees to replace those we cut down. Biomass can be used to provide heat and also to make electricity. The biomass is burnt to heat water and make steam. The steam is then used to make electricity.

1- What is meant by “Renewable energy sources”?

.....

2- Why did Ramzi take The Sun as an example of renewable source of energy?

.....

3- Ramzi told the teacher about two things that we could power on by using the sun energy. Mention them.

.....

4- Although solar cells and panels costs lots of money, but we should turn to this alternative as soon as possible for one reason. Mention it.

.....

5- What we call the place which uses wind power to generate electricity?

.....

6- Nadia says that wind turbines won't work properly in some conditions. Mention them.

.....

7- Quote the sentence which shows how we consider wood a biomass.

.....

8- Why do we burn biomass?

.....

9- Find from the text the following.

- a- An adjective → .....
- b- An adverb → .....
- c- A singular noun → .....
- d- A plural noun → .....
- e- A phrasal verb means "discover" → .....
- f- A phrasal verb means "come to an end" → .....

**Q2: Choose the correct answer.**

1- Last night, my father told me that I .....to take care of my diet.

A- have

B- had

C- am having

D- will have

2- Sami wanted to know;

A- If was she watching her lessons online?

B- If she was watching her lessons online.

C- Was if she watching her lessons online.

D- If she was watching her lessons online?

3- The correct direct sentence of “He said that they were there” is:

A- They are there

B- we were there

C- they were here

D- we are here

**Q3: Rewrite the following paragraph into the reported speech.**

We went to Aqaba last year on the summer vacation. It was a fabulous trip with my family. We did a lot of activities and we were happy to live that experience. I hope to do it again next summer. Adam told me that;

---

---

---

**Q4: Rewrite the following statements so that the new ones have the same meaning.**

1- Sawsan came to the library with her pen friend.

Ahmad said that .....

2- Where do you live?

John asked me .....

**Q5: Fill in the blanks with the correct words from the box.**

**turbines – biomass – heat– tidal – derived– worldwide**

1-A lot of living things depend on the sun's energy for .....

2- ..... is a plant material and animal waste that is used as a fuel.

3-In windy places, wind energy can be used to make electricity, using wind .....

4-An adjective relating to the regular rising and falling of the sea. ....

5-There is a rising ..... dependence on renewable energy.

6- Oil and fuel are two substances that .....from buried thing underground.

**Q6: Write a short paragraph talking about the advantages of using renewable energy resources. (Use simple words, simple phrases)**

.....

.....

.....

.....

Wishing you best of luck

صفحة الحل Answers sheet

Question 1

- 1- That means resources that are continually replaced and won't run out any time soon.
- 2- Because a lot of living things depend on its energy for heat and light.
- 3- The solar calculator and solar panels.
- 4- The major advantage of solar energy is that, after the solar panels have been installed, electricity isn't expensive to generate.
- 5- This place is called "A wind farm".
- 6- a) If there is no wind.      b) If the wind speed is so high.
- 7- For example, wood is a biomass fuel as long as we continue to plant new trees to replace those we cut down.
- 8- To heat water and make steam which generates electricity.
- 9- a) An adjective → renewable – living – major – expensive – windy.  
b) An adverb → continually – sometimes.  
c) A singular noun → project – calculator – advantage – generator.  
d) A plural noun → resources – things – panels – trees – blades.  
e) A phrasal verb means "discover" → find out.  
f) A phrasal verb means "come to an end" → run out.

### Question 2

- 1- b) had      2- b) If she was watching her lessons online.      3- d) we are here

### Question 3

Adam told me that; They had gone/been to Aqaba the previous year/the year before on the summer vacation. It had been a fabulous trip with his family. They had done a lot of activities and they had been happy to live that experience. he hoped to do it again the following summer/the summer after.

### Question 4

- 1- Ahmad said that Sawsan had come to the library with her pen friend.  
2- John asked me where I lived.

### Question 5

- 1- Heat      2-biomass      3- turbines      4- tidal      5- worldwide      6- derived
